EDUCATION

University of Toronto

Master of Engineering Computer Engineering

Toronto, ON

Sep 2017 - Jun 2020

University of Toronto

Honors Bachelor of Applied Science Computer Engineering

Toronto, ON

Sep 2012 - Jun 2017

EXPERIENCE

League Inc.

Frontend Engineer

Toronto, ON
May 2022 - Present

- Developed a digital cross-platform health portal for 2,000,000 users in the United States
- Worked with a React based front-end using react hooks, queries and a modularized mono-repo
- Collaborated directly with Engineering Managers to solution a product highly tailored for an optimal user experience
- Worked in an environment of high uncertainty and tight deadlines, which enabled me to learn a broad spectrum of industry standard CI/CD tools such as CircleCI

Scotiabank

Front-end Software Engineer

Toronto, ON
Mar 2020 - Present

- Developed a fully customizable trading platform using an Angular front-end, and a Spring based RESTful backend
- Implemented a clean redux solution for managing the flow of trade data to the front-end application
- Developed an Angular table component that could handle +100,000s of orders coming in from the backend responsively
- Created a full-stack admin configuration application that allows trade support personnel to make changes to backend systems from a single web app
- Revamped front-end suite of applications into a monorepo and added testing to legacy code using jest

RBC Royal Bank of Canada

Full Stack Developer

Toronto, ON
Sep 2017 - Jan 2020

- Developed a data visualization dashboard for displaying live Fund Accounting data for RBC's partner clients
- Introduced the first kafka based data processing platform to the project, which was later used as a precedent for messaging and data processing across the floor
- Created a custom re-usable angular component for highlighting new features in any RBC angular web application when visited by the user for the first time
- Worked on developing a mobile-first solution for automating mortgage application processes for RBC clients

Intelliware Development Inc.

Software Developer

Toronto, ON
May 2015 - Aug 2016

- Worked on developing a fund trading platform for our client
- Led cross-team design sessions to determine project solutions collaboratively
- Developed a SSO log-in portal for a suite of applications, using Angular for the front-end, and Spring for the backend
